PROJECTS

PassVault - Secure Password Manager Web Application | MERN Stack

- Built a **production-grade password vault** with **zero-knowledge-inspired client-side encryption**, ensuring plaintext credentials never reach the backend.
- Implemented **OTP-based 2FA, trusted device binding, and refresh token rotation**, strengthening secure session handling.
- Designed a secure JWT lifecycle using **HTTP-only cookies**, auto session restore, and **vault auto-lock after inactivity** to prevent token hijacking.
- Developed a responsive credential manager supporting **CRUD operations, search/filtering, favorites, clipboard auto-clear**, and encrypted vault export/import.
- Engineered backend security layers including **rate limiting, audit logging, breach detection (HIBP API)**, and **deployed on Vercel + Render + MongoDB Atlas**, resolving production issues like **CORS, cookie persistence** and **OTP email delivery**.

ThinkBoard — Notes & Productivity Web App | MERN Stack

- Built a responsive notes platform with full CRUD workflows using React, Express, and MongoDB Atlas.
- Designed REST APIs with Tailwind-based mobile UI, plus backend reliability features like rate limiting and secure env configuration.

TRAINING & EXPERIENCE

CDAC Kolkata — In-House MERN + Java Training (20 Days) (Certificate Expected)

- Built **Online Examination & Evaluation Portal** (Team of 10); contributed to backend APIs + MongoDB integration
